Reviewer’s report

Title: The Protective Effect of Persistent Trigeminal Artery in Patients with Ischemic Stroke

Version: 0 Date: 15 Oct 2018

Reviewer: Bita Abbasi

Reviewer's report:

This case report, reports an uncommon neurovascular variant that has been suggested to be a risk factor for cerebral stroke. In this manuscript, the author suggest a rather protective role for this variant. As this is a case report with low-level of evidence, I recommend not using strong words like "prove" as in this phrase "this was the first case in a real patient that proved the...".

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
