Reviewer’s report

Title: Four collateral circulation pathways were observed after common carotid artery occlusion

Version: 0 Date: 02 Jul 2019

Reviewer: Harold Adams

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

The paper reports on the types of collateral circulation among patients with CCA occlusion. The results are interesting and the images are spectacular. The reviewer recognizes that English is not the native language of the authors and commends them for their efforts. Still, the paper does need additional work on usage and syntax.
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
