Reviewer’s report

Title: Multiple Cerebral Metastases and Metastatic Aneurysms in Patients with Left Atrial Myxoma: A Case Report

Version: 0 Date: 26 Jul 2019

Reviewer: Stefan Martin Golaszewski

Reviewer's report:

An interesting case report that is relevant for the practicing clinician. It is clearly well written and easy to read. Background and clinical workup of the case is comprehensively presented. How was the patient further treated after left frontotemporal raniotomy with tissue excision and left ACA arterial aneurysm clipping? A description of the further treatment and outcome of the patient would be interesting. Why did the authors not present native T1 images, especially for demonstration of intracranial hemorrhage? The authors should provide more general recommendations for the management of a patient with atrial myxoma and multiple cerebral metastases and metastatic aneurysms. Should there be a screening with regard to cerebral complications in patients with atrial myxoma?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript
