Reviewer's report

Title: Isolated hypoglossal nerve palsy from internal carotid artery dissection related to PKD-1 gene mutation

Version: 1 Date: 04 Sep 2019

Reviewer: Maurizio Acampa

Reviewer's report:

This paper presents an interesting case of symptomatic internal carotid artery dissection related to PKD-1 gene mutation.

The paper needs some language corrections.

I have the following comments:

1) It would be interesting to know if, in the present case, there were other renal and extrarenal abnormalities associated to PKD1 mutation (see Bergmann C. Nature Reviews Disease Primersvolume 4, Article number: 50 (2018)).

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
