Reviewer's report

Title: Interaction between COX-1 and COX-2 increases susceptibility to ischemic stroke in a Chinese population

Version: 1 Date: 06 Jun 2019

Reviewer: Ruth Stetler

Reviewer's report:

The paper submission by Lei et al. indicate an association between various COX variants and stroke susceptibility in a Chinese Han population. These results are interesting and fairly well discussed (minor language editing would be useful). In addition to assessing stroke susceptibility, comparisons between the COX variants and other factors in the included population that may affect susceptibility (e.g., diabetes, hypertension, length of smoking) would be useful to be presented, with appropriate control groups. The authors state an adjustment was made for related risk factors; however, a question remains as to whether the studied variants would also correlate to those risk factors.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
Quality of written English
Please indicate the quality of language in the manuscript:

Needs some language corrections before being published

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests
