**Reviewer’s report**

**Title:** Great auricular nerve schwannoma in neck region: a case report with the risk of medical disputes

**Version:** 0  **Date:** 09 Jul 2019  
**Reviewer:** Samer Hoz

**Reviewer's report:**

Reports about the schwannomas out of their common sites are always interesting and have good impact on the future direction of management and research in such topic. Thus, new reports on the subject are valuable. The authors’ hearts are in the right place. The article is well written, the flow of information is quite professional, and it deserves to be published after taking the following comments in consideration:

In figure 2 and 3, the comments and the figure are not quite self-explanatory. I would recommend a more detail description in the figure legends and adding anatomical direction, landmarks as well as pointers for the figures to attain more comprehensive figures for the readers.

**Are the methods appropriate and well described?**

If not, please specify what is required in your comments to the authors.

Yes

**Does the work include the necessary controls?**

If not, please specify which controls are required in your comments to the authors.

Yes

**Are the conclusions drawn adequately supported by the data shown?**

If not, please explain in your comments to the authors.

Yes

**Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?**

If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript

**Quality of written English**

Please indicate the quality of language in the manuscript:
