Reviewer’s report

Title: THE EAGLE JUGULAR SYNDROME

Version: 0 Date: 12 Aug 2019

Reviewer: Alessia Giaquinta

Reviewer's report:

This is a novel and interesting report on a further cause of internal jugular vein narrowing. It is well written with correct statistical analysis.

However, a revision is needed in order to better understand either the surgical indications or the reasons of the vascular outcome of the reported case:

- Why did the authors report just one operated case?

- There is a classification of the internal jugular vein phlebograms but the Authors did not use and cite it, yet. The Authors have to grade the exemplificative case according to it, discussing the vascular outcome.

Please verify and correct the sentence at page 7 line 2 in RESULTS section
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
