Reviewer’s report

Title: A Rare But Treatable Cause of Recurrent Chest Pain - Ictal Chest Pain

Version: 1 Date: 24 Nov 2019

Reviewer: Yasukiyo Araki

Reviewer's report:

Dear authors, In this case report, the authors reported an ictal chest pain which might be related to focal epilepsy. Ictal chest pain related to epilepsy is very rare, so that it is very interesting and important for elucidating a part of the localization of brain function. Thank you for your clarifications to the manuscript. However, I have a concern as below;

Minor points

In Supplementary Movie, the patient's face is visible. If the blurring is important to the patient's confidentiality/consent for participation, please edit it. In addition, please take care personal information for example recorded time and patient's name.

Sincerely yours

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
