Reviewer's report

Title: The Association between Maternal Blood Pressures and Offspring Size at Birth in Southeast Asian Women

Version: 2
Date: 27 October 2014
Reviewer: Katherine Bowers

Reviewer's report:

No further revisions are requested. The authors responded comprehensively to both my suggestions and those of the other reviewer.

Minor typo line 1, page 8
"All analyses were adjustment for baby's gender" to
"All analyses were adjusted for baby's gender"
more appropriate also to refer to 'sex' not 'gender'

line 7
"blood pressures as continuous variable and ethnicity or BMI as categorical variable" to
"blood pressures as continuous variables and ethnicity or BMI as a categorical variable"

line 8
"likelihood ratio test was used to evaluation of significance." to
"likelihood ratio test was used to evaluate significance."

page 10, line 1
"No significant ethnic modification were found"
is this supposed to be effect modification by ethnicity?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
