Reviewer's report

Title: Knowledge and future preference of Chinese women in a major public hospital in Hong Kong after undergoing non-invasive prenatal testing for positive aneuploidy screening: a questionnaire survey

Version: 4 Date: 19 June 2015

Reviewer: Annette Bernloehr

Reviewer's report:

After two revision-rounds the manuscript is now acceptable for publication. However, as the paper relates to a pilot study, a much deeper discussion of the actual strengths and weaknesses of the study itself (and especially the questionnaire), rather than the (more or less quality findings) would have been desirable. The final publication definitely needs a knowledgeable reader.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
