Reviewer’s report

**Title:** Immediate postplacental insertion of a copper intrauterine device: A pilot study to evaluate expulsion rate by mode of delivery

**Version:** 2  **Date:** 1 June 2015

**Reviewer:** Rosita Aniuliene

**Reviewer’s report:**

Having read it carefully, I have several remarks.
1. Please, put the number of ethical approval.
2. I found a few English grammar and spelling mistakes. Please, read carefully.
3. I recommend to check a sample size calculation before the study—is it correct?
4. The structure of the manuscript: background, methods, statistics and conclusions are correct. But you must to separate the results and discussion section.

Minor essential revisions.

Reviewer: Rosita Aniuliene

**Level of interest:** An article of importance in its field

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
