Reviewer's report

Title: Risk factors for antenatal vitamin D insufficiency in an urban district in Malaysia

Version: 4 Date: 15 February 2016

Reviewer: Andrea E Cassidy-Bushrow

Reviewer's report:

Minor Essential Revisions

Throughout the manuscript, the authors should reduce data to only show up to 2 decimal places.

It remains unclear what a 0.3% reduction in hypovitaminosis risk means clinically.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.
