Reviewer’s report

Title: TRIAL OF LABOUR OR ELECTIVE REPEAT CAESAREAN DELIVERY: ARE WOMEN MAKING AN INFORMED DECISION AT KENYATTA NATIONAL HOSPITAL?

Version: 0 Date: 12 Dec 2016

Reviewer: Hubertina Scheepers

Reviewer's report:

It is very nice to see a study from Africa that advocates women’s right to make informed choices on their own health.

Although some comments can be made on possible bias in women not receiving the questionnaires the results are clear: in most cases no real informed choice is made.

One could add to the discussion that the use of prediction models and shared decision aids can be helpful in counseling women with previous CD and make some additional references to the practice variation internationally.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
