Reviewer’s report

Title: A descriptive study of the health information needs of Kenyan women in the first 6 weeks postpartum

Version: 1 Date: 30 May 2017

Reviewer: Wondimu Gudu

Reviewer's report:

Despite its notable methodological limitations, this is a very nice study. Qualitative studies such as this focusing on consumer views/satisfactions/needs are vital in improving quality of care provision. It will also sensitize researchers to undertake in depth analysis of the content and quality of postnatal care/health information provision by providers/health facilities.

Comments are uploaded as attachment and sections of the manuscript which deserve attention (revision) are highlights in the pdf format of the manuscript (which is also attached).

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
