Title: Low birthweight in Rural Cameroon: an analysis of a cut-off value.

Version: 0 Date: 14 Jul 2017

Reviewer: Abdulai Abubakari

Reviewer's report:

Authors are not able to provide enough basis for the proposed cut-off-point of 2700g in the manuscript. They claimed that babies who were born with birth weight between 2500g and 2700g were not adequately catered for but the basis of this claim is unavailable in the results or the literature review provided. Therefore, it is difficult to assess the merit of the manuscript without this missing information.
