Title: Development of a tailored strategy to improve postpartum hemorrhage guideline adherence

Version: 1 Date: 31 Aug 2017

Reviewer: Ashraf Nabhan

Reviewer's report:

Thank you for taking our comments on board.

1. Some minor editing for grammar and spelling mistakes.

2. Limitations should acknowledge the limitations of your work not the lack of knowledge for strategy selection. The non-comprehensive literature search, the barriers forming the base for the strategy being derived from a HIC health service, the need for empirical evidence that this tailored strategy would improve adherence to PPH guidelines as a surrogate to improved outcomes etc.

3. Kindly revisit the conclusion. for instance, the sentence "The next steps are testing the feasibility and effectiveness of the strategy in the clinical practice" would not be a conclusion. This sentence forwards to the end of the paragraph would fit the end of the discussion.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
