Title: Do Pregnancies Reduce Iron Overload in HFE Hemochromatosis Women? Results from an Observational Prospective Study

Version: 0 Date: 20 Feb 2017

Reviewer: Elvira Guerra-Shinohara

Reviewer's report:

This is an interesting study, but some questions need to be clarified:

1- The numbers of individuals in the tables vary and there are no answers. What is the impact of these missing information?

2 How long ago occurred births, regular blood donations, chronic bleeding or blood transfusions? This time can not be a confounding factor?

3- Table 4 - it is not clear in the table what is IQR;
4- Usually, the value p is described to three decimal places.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
