Title: Adaptation and Psychometric Evaluation of the Breastfeeding Self-Efficacy Scale to Assess Exclusive Breastfeeding

Version: 1 Date: 22 Dec 2018

Reviewer: Sonia Semenic

Reviewer's report:

Thank you for for this revised manuscript. All my comments from my first review have been adequately addressed. I have only a few additional, minor revisions to suggest for this revised manuscript:

p. 14, Table 1 - the legend should be written: N (%) / Mean (SD) (otherwise all the figures in brackets are assumed to be SDs)

p. 22 - Predictive validity - it would help to indicate at what time points exclusive breastfeeding behavior was measured (ie, did the BSE-EBF at 1 month and 3 months predict exclusive BF at 6 months?)

p. 24 line 483 - clarify that the original BSES-SF assesses CONFIDENCE in any breastfeeding.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
