Reviewer’s report

Title: Experiences of interactive ultrasound examination among women at risk of preterm birth: a qualitative study

Version: 0 Date: 19 Jan 2019

Reviewer: Matthew Hoffman

Reviewer's report:

This qualitative study of patient guided ultrasound and its impact on maternal stress is generally well written and well conducted. The sample sizes limited at 12 patient's and the meaningfulness of the outcomes are limited because of this. Nonetheless, this study is somewhat unique. The presentation is occasionally lengthy and there opportunities for further focusing the paper.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
