Reviewer’s report

Title: Effects and outcomes of septostomy in twin-to-twin transfusion syndrome after fetoscopic laser therapy

Version: 0 Date: 09 Sep 2019

Reviewer: Maria Delius

Reviewer's report:

Dear authors, thank you very much for this well presented data.

I just wold like to have discussed one thing - why was laser treatment done in Quintero stage I? Regarding the same risk of septostomy over all Quintero stages - as you reported - I have missed a discussion about indications for last therapy in early Quintero stages regarding the risks of laser procedure.

You could add that to the discussion.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
