Dear author,

This manuscript is well prepared and well written, but I noticed that you did not write any thing about ethical approvals and considerations in the manuscript, although these are initial steps before conducting the study, please write this part.

secondly, the sample size calculations were not described and the sampling plan also. Would you please explain how did you calculate the sample size and how did you recruit the participants?

finally, the conclusion is similar to discussion, you have to rewrite it to be as 'a message to be taken home' from the study, not repetition of results and discussion.

Regards.
