Reviewer’s report

Title: Enhanced Tumour Cell Nuclear Targeting in a Tumour Progression Model

Version: 4 Date: 23 December 2014

Reviewer: Yongzhuo Huang

Reviewer’s report:

Authors have been properly addressed the raised questions, and it is recommended the manuscript be accepted.

Minor issues in writing:

1. Space should be placed between the numbers and the units. For example, on pg 17, line 400, for "40mg", read "40 mg".
2. Line 401, for "ph7.5", read "pH 7.5".
3. Line 405, for "100ul", use the Greek alphabet "μu".
4. The multiplication sign is the symbol ×, not misusing the letter X.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
