Reviewer’s report

Title: Tertiary lymphoid structures are associated with higher tumor grade in primary operable breast cancer patients.

Version: 4 Date: 15 December 2014

Reviewer: Carmen Criscitiello

Reviewer’s report:

This is a very interesting and well-written article on the role of TLS on such a large series.

The paper is acceptable in its present form; however, I think that adding TIL evaluation would add value.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
