Reviewer’s report

Title: Treatment and survival of non-alcoholic steatohepatitis associated hepatocellular carcinoma

Date: 31 December 2014

Reviewer: Tejinder Kataria

Reviewer’s report:

Although retrospective in nature the authors have brought out very good differences in NASH and non NASH HCC and the article will add to the understanding of natural history of NASH HCC. This forms the cornerstone of my recommending the manuscript for acceptance. The statistical methods and tests have been aptly applied.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
