Reviewer's report

Title:eCROPS-CA: a systematic approach toward effective and sustainable cancer prevention in rural China

Version:7 Date:10 December 2014

Reviewer:Johanna E. Maree

Reviewer's report:

All the queries have been addressed - thank you. Your explanation of literacy level of the farmers, the easy access to the clinics and the patient load of the doctors clarified most of the issues raised.

I would like to suggest that you pre-test the information leaflets and web pages just to make sure that the farmers understand the message before you start.

Best wishes with this study. I am looking forward to the findings.

Level of interest:An article of outstanding merit and interest in its field

Quality of written English:Acceptable

Statistical review:Yes, but I do not feel adequately qualified to assess the statistics.
