Reviewer's report

Title: Safety and feasibility of adjuvant chemotherapy with S-1 in Japanese breast cancer patients after primary systemic chemotherapy: a feasibility study

Version: 2 Date: 2 December 2014

Reviewer: Daisuke Takahari

Reviewer's report:

Major Compulsory Revisions
The author's conclusions are seems to odd.
1. Authors couldn't conclude S-1 is feasible without exception of the withdrawal patients. It is a major vias.
2. Authors couldn't also conclude without any statistical hypothesis set before this study was initiated.
3. Authors should show the reason why they chose this schedule of a 2-week administration and a 1-week rest. In gastric cancer, it is not an ordinary choose in this regimen.

Minor Essential Revisions
1. The authors should state how long S-1 continues as adjuvant therapy.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
