Reviewer's report

**Title:** The prevention, detection and management of cancer treatment-induced cardiotoxicity: A meta-review

**Version:** 3  
**Date:** 16 April 2015

**Reviewer:** Steven Lipshultz

**Reviewer's report:**

I appreciate the authors' thorough response to the reviewer comments. It seems the manuscript has been greatly improved. I have only a few additional minor revisions as noted below.

1. In the abstract, line 21, please change "can reduce" to "might reduce".

2. In the background, line 15, please remove the semicolon after reference 7.

3. Page 8, line 22, the authors wrote: "The majority were published from 2010 onwards." This is misleading. It might be better to just give the range of years of publication (2007-2013).

4. Page 9, line 12, after "majority" it would be helpful to include the percentage. For all the other descriptions there is either an absolute number or percentage, and so would be good to include either or both here as well.

5. Page 18, line 12, please add a space between the 1 and "evidence".

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
