Reviewer’s report

Title: Low expression levels of hepsin and TMPRSS3 are associated with poor breast cancer survival

Version: 2 Date: 17 April 2015

Reviewer: Brian F Clem

Reviewer’s report:

The authors have adequately addressed all of my previous major compulsory revisions and minor essential revisions.

Discretionary revision:

Page 13, top sentence should be changed to "yet was not significant during the 20-year follow up period"

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I have no competing interests.
