Reviewer's report

Title: Effects of statin use on volumetric mammographic density: results from the KARMA study

Version: 3 Date: 26 November 2014

Reviewer: Simona Pisanti

Reviewer's report:

Minor Essential Revisions
The authors should describe and discuss more thoroughly the association between mammographic density measurement and breast cancer risk also for not expert readers.
The authors should indicate the meaning of an abbreviation the first time that it's cited in the text.
The authors should check the manuscript for typos and english language.

Major Compulsory Revisions
In table 3 the authors should show also the results without any adjustment.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
