Reviewer’s report

Title: Pharmacological targeting of valosin containing protein (VCP) induces DNA damage and selectively kills canine lymphoma cells.

Version: 6 Date: 21 April 2015

Reviewer: Yihong Ye

Reviewer’s report:

The authors have addressed my concern. The only remaining point is that the authors changed the name of the compound to EER-1 throughout the text, but the figures still use Eey1. This problem needs to be fixed.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
