Reviewer’s report

**Title:** Concept and design of a nationwide prospective feasibility/efficacy/safety study of weekly paclitaxel for patients with pathologically confirmed anaplastic thyroid cancer (ATCCJ-PTX-P2)

**Version:** 2  
**Date:** 1 May 2015

**Reviewer:** Anurag Singh

**Reviewer’s report:**

**Major Compulsory Revisions**

I am not sure why this manuscript was submitted when the results form the study are expected to be mature last month (April 2015.)

Would it not make more sense to simply publish a manuscript containing the results of the study?

**Minor Revisions**

The manuscript would benefit from an English language editor.

**Level of interest:** An article of insufficient interest to warrant publication in a scientific/medical journal

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
