Reviewer’s report

**Title:** Nrf2 is a potential prognostic marker and promotes proliferation and invasion in human hepatocellular carcinoma

**Version:** 4  
**Date:** 9 April 2015

**Reviewer:** Moo Jun Baek

**Reviewer’s report:**

Discretionary Revisions

Nuclear factor (erythroid-derived 2)-like 2 is more commonly known as NFE2L2 rather than Nrf2.  
I recommend to replace the gene name Nrf2 to commonly known NFE2L2 in the manuscript.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.

**Declaration of competing interests:**

I declare that I have no competing interests.
