Version: 2 Date: 3 April 2015

Reviewer’s report:

Major essential revisions:
The resolution of figures in Fig 3, 4 and 5 is of low quality. Can the authors use a vector program instead of just excel? Also Fig 4 a and 5 c is really bad. This needs to be improved significantly. In Fig 5c, the images are not even the same size.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
