Reviewer’s report

**Title:** A network meta-analysis of therapeutic outcomes after new image technology-assisted transurethral resection for non-muscle invasive bladder cancer: 5-aminolaevulinic acid fluorescence vs hexylaminolevulinate fluorescence vs narrow band imaging

**Version:** 2  
**Date:** 14 April 2015

**Reviewer:** Vitaly Margulis

**Reviewer’s report:**

Important and well executed study. Conclusions are well supported and not over-stated.
Analyses appear to have been done rigorously and well.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.

**Declaration of competing interests:**
