Reviewer’s report

**Title:** Incarvine C suppresses proliferation and vasculogenic mimicry of hepatocellular carcinoma cells via targeting ROCK inhibition

**Version:** 3  **Date:** 16 August 2015

**Reviewer:** Kriengsak KL Lirdprapamongkol

**Reviewer’s report:**

Minor Essential Revisions

The author’s response to my comments is satisfactory to me. Especially, the explanations in “response to comment 1” are clear enough, and I suggest that the authors should add the whole explanations in the response to comment 1 into Discussion part. It will make the readers understand why the different effect between IVC and Y27632 was observed.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
