Title: Hypercalcemia in metastatic GIST caused by systemic elevated calcitriol: A case report and review of the literature.

Version: 2 Date: 1 August 2015

Reviewer: Annekathryn Goodman

Reviewer's report:

Here are my comments:

I have no competing interests.

The article is well written. The implications of this report is the recommendation to add GIST to the list of cancers that can cause malignant hypercalcemia.

My one suggestion for the authors is to make a table with the lab values and also a graph of the levels of calcium and calcitriol as a function of therapy.
