Reviewer’s report

Title: Prediction of survival prognosis after surgery in patients with symptomatic metastatic spinal cord compression from non-small cell lung cancer

Version: 1 Date: 16 Sep 2015

Reviewer: Jonathan Gottlieb

Reviewer's report:

Thank you for addressing the issues presented. I believe this paper adds meaningful information to the literature as contemporary medical oncologic management has markedly improved survival for malignancies of various histologic subtypes. Disease specific scoring systems will likely become more commonplace and guide surgical treatment.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review

Quality of written English
