Reviewer's report

Title: Combination of four molecular markers improves thyroid cancer cytologic diagnosis and patients management

Version: 2 Date: 16 May 2015

Reviewer: Fong-Fu Chou

Reviewer's report:

If a positive BRAF V600E mutations means papillary cancer why yo do four molecular markers after this study?

What are the results of four molecular markers other than papillary cancer such as follicular cancer, follicular adenoma or poor differentiated cancer

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
