Reviewer's report

**Title:** Aberrant GSTP1 promoter methylation is associated with increased risk and clinical stages of breast cancer: a meta-analysis of 19 case-control studies

**Version:** 3  **Date:** 1 July 2015

**Reviewer:** Tanett Pongtheerat

**Reviewer's report:**

1. In the abstract will add more data,
   Overall, the pooled results indicated that aberrant GSTP1 promoter methylation was significantly associated with the risk of breast cancer (OR=7.85, 95%CI=5.12-12.01, Caucasians OR=7.23, 149 95%CI=3.76-13.90 and Asians OR=11.71, 95%CI= 5.69-24.07).

2. In the result , the author can analyze more about the data of OR that include the 11 articles without control group for more number of case group to show that differ from present result or not.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
