Reviewer's report

Title: Potential Angiogenic Effect Of Human Chorionic Gonadotropin Hormone In Rapid Progression And Spontaneous Regression Of Metastatic Renal Cell Carcinoma During Pregnancy And After Surgical Abortion. A case report.

Version: 5  Date: 10 November 2015

Reviewer: Aya El helali

Reviewer's report:

There are only minor changes that need to made to this document:

it certainly reads much better and my main comment is to condense the histological report on page 4. whilst I enjoyed learning more about the histology I think sentence 6-10 can be condensed nicely.

secondly to state the number of fractions of radiotherapy (line 21 page 4)

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
