Reviewer’s report

Title: RASSF1 tumor suppressor gene in pancreatic ductal adenocarcinoma: correlation of expression, chromosomal status and epigenetic changes.

Version: 0 Date: 27 Oct 2015

Reviewer: Dominique Bernard-Gallon

Reviewer's report:

This manuscript is insufficient to be published in BMC Cancer.

The authors chose to present "Results and Discussion" at the same time. But, only results were described without any discussion of the results.

Just the last paragraph of the results and discussion seemed to be the discussion.

The title and the summary seemed interesting but the data were not convincing.

The references in epigenetics were very old, 2003, 2005,..

Are the methods appropriate and well described?

If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?

If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?

If not, please explain in your comments to the authors.

No
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?

If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
