Title: Molecular Targeted Photoimmunotherapy for HER2-positive Human Gastric Cancer in Combination with Chemotherapy Results in Improved Treatment Outcomes Through Different Cytotoxic Mechanisms

Version: 0 Date: 01 Sep 2015

Reviewer: Samuel Klempner

Reviewer’s report:

The authors have addressed my initial concerns in the revised manuscript. I would suggest alternate language be used on line 369, as more in-vivo data is needed to determine if this method is "practical". I may say "promising" or "a potential therapy" as I do not feel that the data presented support or address the practicality of the therapy (PIT).

Overall I feel the current version is relevant to the journal readership and add to the current knowledge of photoimmunotherapy in gastric cancer.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
