Reviewer’s report

Title: Successful Treatment of Gemcitabine-Induced Acute Interstitial Pneumonia With Imatinib Mesylate: a Case Report

Version: 0 Date: 07 Apr 2016

Reviewer: Angela Marten

Reviewer's report:

This is an interesting case report who might help to raise awareness for this rare side effect of gemcitabine.

It was good to read that the patient recovered completely. However, I would recommend to weaken the conclusions on imatinib's efficacy in treating idiopathic fibrosis. This is a single case experience. A general overview on treatment options for idiopathic fibrosis should be given.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
