Reviewer’s report

Title: Successful treatment with anti-programmed-death-1 antibody in a relapsed natural killer/T-cell lymphoma patient with multi-line resistance: A case report

Version: 0 Date: 17 Apr 2017

Reviewer: Amit Singh

Reviewer's report:

I found Jianping Lai et al. case report titled "Successful anti-PD-1 antibody treatment in a relapsed NK/T lymphoma patient with resistance to multi-line treatment: a case report" an interesting case and well presented in this report.

PD-1 is now being seen as potential target for many diseases and use of pembrolizumab in the case of relapsed NKTCL appears exciting. It appears to be pretty effective!

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
