Reviewer’s report

Title: Association between tumour infiltrating lymphocytes, histotype and clinical outcome in epithelial ovarian cancer

Version: 0 Date: 13 Jun 2017

Reviewer: Pashtoon Kasi

Reviewer's report:

Dear Authors,

I would like to congratulate you on a job well done.

1. Manuscript very nicely written, easy to follow.
2. Incorporates a simple IHC technique with clinical meaning and easy to translate.
3. In an era of immunotherapy, it is of great value.
4. Larger sample size allows for analyses presented.

Out of curiosity, did you compare the TILs between 2 metastatic samples from the same patient to demonstrate inter-tumor heterogeneity in the same patient. That may be a separate project to look at.

I would recommend accepting it without revisions.

Good wishes,

Pashtoon.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
