Title: Exercise and Cancer-Related Fatigue in Adults: A Systematic Review of Previous Systematic Reviews with Meta-Analyses

Version: 0 Date: 07 Jul 2017

Reviewer: Marilynne Kirshbaum

Reviewer's report:

While I appreciate the justification and rigour of this report of a 'systematic review of systematic reviews and meta analysis', it falls short of providing useful implications to practitioners and the public. Substantially more detail of conclusions are expected. The review is highly critical of well respected and authoritative authors, yet does not provide much substance for how the findings can be used. I would suggest that revisions would consist of more detail and depth to the sections on implications for practice and policy.
