Reviewer’s report

Title: An inflammation-based cumulative prognostic score system in patients with diffuse large B cell lymphoma in rituximab era

Version: 4 Date: 10 Oct 2017

Reviewer: Hao Wang

Reviewer's report:

The revised analysis looks fine with me. I have a few minor suggestions.

1. In the first line on Page 7, it should read "determined using time-dependent operating characteristic (ROC) analysis."

2. It would be good to describe the definitions of PFS and OS precisely. For example, PFS was defined as time from the date of diagnosis to the date of first lymphoma progression or death from any cause, or censored at the date of last follow-up for the patients who were alive and did not have lymphoma progression.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
