Reviewer’s report

Title: A Novel Combined Systemic Inflammation-Based Score Can Predict Survival of Intermediate-to-Advanced Hepatocellular Carcinoma Patients Undergoing Transarterial Chemoembolization

Version: 2 Date: 29 Sep 2017

Reviewer: Toshiya Kamiyama

Reviewer’s report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

This paper described that the dNLR-PNI can predict the survival outcomes of 36 intermediate-to-advanced HCC patients undergoing TACE. The authors well respond to reviewers' comments. Therefore, it is suitable in its current form for publication in BMC cancer.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
