Reviewer’s report

Title: Epstein-Barr virus positive peripheral T cell lymphoma with novel variants in STAT5B of a pediatric patient: a case report

Version: 1 Date: 06 Mar 2018

Reviewer: CARLOS MONTEAGUDO

Reviewer’s report:

This is a report of a very unusual and interesting case of pediatric lymphoma which may be of interest to the readers of the journal.

However, English corrections are needed (Page 7, lines 27 and 56; page 8, line 50; page 10, line 9; page 11, line 12). In page 5, line 56, "median" eosinophilic nucleoli. Why not "central".

In addition, the authors say (page 5, lines 50-51 and 59) that there are "significant mitotic figures". What does it mean? numerous? atypical? Be more specific.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
