Reviewer's report:
Authors provided the data for PEST-containing nuclear protein mediates the proliferation, migration, apoptosis of human neuroblastoma cells through MARPK and PI3K/Akt/mTOR signal pathways.

1. What was the time point of collecting samples for qPCR and Western blot analysis?
2. In generally, increased pERK will up regulate the expressions of Bcl-2, Bcl-xL and dawn regulate the expression of Bad to prevent the apoptosis process, which will evoke the arguments with the data from your manuscript.
